DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 18-20 and 25-27, drawn to a multilayer plastic molding.

Group 2, claim(s) 21-24, drawn to a plastic molding made with a specific polymer composition.

Group 3, claim(s) 28, drawn to a process for making a plastic molding.

Group 4, claim(s) 29 and 31, drawn to a third type of plastic molding.

Group 5, claim(s) 30, drawn to a fourth type of plastic molding.

Group 6, claim(s) 32, drawn to a process for making a plastic molding different from the plastic molding made in group 3.

2. The inventions listed as Groups 1-6 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature (STF) of group 1 is the fiber content, the thickness of the film, and the fiber lengths specified. The STF is rendered obvious through the combination of Grefenstein et al. (CA Pat. No. 2,221,266), provided by the applicant on their Information Disclosure Statement, and Rohrmann. Since the STF in group 1 is rendered obvious by the references, the inventions in groups 1, 2, and 3 do not share a single general inventive concept and restriction between groups 1, 2 and 3 is proper.

The STF of group 4 is the combination of the ASA/PC plastic with the amount of fiber present, the application method for the fibers, the thickness of the film, and the length of the glass fibers. The STF of group 5 is the combination of the PBT/ASA plastic with the

amount of fiber present, the application method, and the thickness of the film. The STF of group 6 are the coextrusion techniques and the thermoforming techniques described. The STF's of groups 1-3, 4, 5, and 6 are therefore different and restriction between these groups is proper.

3. A telephone call was made to Mr. Surinder Sachar on July 22, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
